

# The Education System in Poland

Google offers application for lessons

# Nursery

- It starts at the age of 1,5 year - ends at the age of 3 years
- Children learn there how to name things, animals, colours, they have sleeping time, they also play with each other

# Kindergarten

- It covers the years from 3 to 7 years old
- Children learn there how to read, write, count, they also learn the basics of a foreign language

# Primary school

- 
- It lasts from the age of 7 to 15
- 
- The first three year cycle is “integrated”, with one teacher handling all or most of the subjects, while the following five years offer a subject-based teaching with different teachers
- The education uses a numeric system of grades from 1 to 6

# High school

- It starts at the age of 15 years old - ends at the age of 19 years old
- It takes four years. Students learn there extended subjects and compulsory school subjects like Maths, Polish language or English language
- After four years, students take Matura examination, which gives access to higher education

# Upper education

- The upper education begins at the end of full-time compulsory education.
- It takes many forms: university, technical university, training college, business college etc.

# Thank you for attention :)
